Abstract

This research deals with the question of improving the functional performance for the Scienc Labs of Primary Education Buildings in The Gaza Strip by taking into account the most important standards and design norms for the spaces.

The study at hands considers the following:
- Design criteria for the Scienc Labs spaces (Room Data).
- Design norms for the Scienc Labs’ spaces.

This research has lead to highlighting the most important standards and appropriate design norms for Scienc Labs Education Buildings, in order to improve their functional performance.
