Introduction for Studying the Designing Basics of Architectural Spaces
Spaces of Primary Education Buildings in Gaza Strip – Case Study-
Dr. Nader Gawad ALNEMRA

*Abstract*
This research deals with the question of improving the functional performance of Primary Education Buildings in the Gaza Strip, by taking into account the basic design standards for the spaces forming the school building during the design phase, which are represented in the following:

- Studying The Basics of Spaces Design for The School Building
- Studying The Basics of Defining The Spaces Elements Forming The School Building

reaching to the most important conclusions and recommendations supporting the design basics of spaces of primary schools buildings, in order to improve the efficiency of the functional performance.
