The Artistic Trends of Architecture from the Contemporary Concept

Dr. Abdel Wahab Ali Abdel Wahab
Lecturer, Shubra, Faculty of Engineering, Banha University

Abstract:

By the fast development of information transfer and its higher density, new artistic trends and philosophies have spread liberated from all restrictions and limitations. Also the philosophies accompanying the artistic trends have transferred to styles & trends. This research has dealt with these contemporary trends and movements of plastic art in general and architectural art in particular through an analytical inductive method and an analytical comparative method among the contemporary trends of plastic art and architectural art within a time period specifically on the 20th century. The research aims at monitoring the trends of architectural art in an analytical study for consolidating the cultural and artistic yield for the informatics era, searching for the formulation of philosophy that elevates the level of the architectural Engineer.
